

ADITHYA G

DATA ANALYST

Bengaluru, Karnataka | +91 9380559581 | adithyagurikani@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on experience building analytics projects using Python, SQL and Power BI. Skilled in data cleaning, exploratory data analysis, feature engineering, business-focused SQL analysis, customer segmentation, trend analysis and dashboard development. Built end-to-end projects across customer shopping, quick-commerce and job/brand datasets, translating raw data into clear business insights.

TECHNICAL SKILLS

Programming & Analysis	Python, Pandas, NumPy
SQL & Databases	SQL, PostgreSQL, MySQL, Joins, Aggregations, Subqueries, CTEs, Window Functions
BI & Visualization	Power BI, Tableau, Matplotlib, Seaborn
Analytics	Data Cleaning, EDA, Feature Engineering, KPI Analysis, Customer Segmentation, Trend Analysis
Statistics	Statistics fundamentals
Spreadsheet	Microsoft Excel
Tools	Jupyter Notebook, Git, GitHub

PROJECTS

Customer Shopping Behavior Analysis | *Python | SQL | PostgreSQL | Power BI*

- Analyzed 3,900 customer purchase records across 18 attributes to identify spending patterns, product preferences, customer segments and subscription behavior.
- Cleaned and transformed data with Python/Pandas, handled missing review ratings, standardized columns and engineered age-group and purchase-frequency features.
- Loaded the cleaned dataset into PostgreSQL and answered business questions using SQL, including revenue, discount usage, product ratings, shipping and subscription analysis.
- Segmented customers into New, Returning and Loyal groups and evaluated repeat-purchase and subscription patterns.
- Built an interactive Power BI dashboard covering customer count, average purchase amount, ratings, category revenue/sales and age-group performance.

Blinkit Trend Analysis | *Python | Pandas | Jupyter Notebook | Data Visualization*

- Performed order-level and product-level analysis using dedicated Python/Jupyter notebooks to identify retail and quick-commerce trends.
- Applied data preparation, exploratory analysis and visualizations to examine order patterns and product performance.
- Converted analytical findings into business-oriented insights using Python-based data analysis and visualization.

Job Application & Brand Analytics | *Python | SQL | Power BI | Data Cleaning*

- Analyzed a 20,000-row job application dataset to inspect applicant profiles, experience, qualifications, job roles, industries and compensation fields.
- Performed Python/Pandas data inspection and cleaning on real-world structured datasets and used SQL for analytical queries.
- Conducted brand and retail dataset analysis across brands, categories, countries, customer income levels, orders, revenue and ratings.
- Built Power BI dashboards with KPIs and interactive visuals for brand, category, customer and revenue performance.

EDUCATION

B.E. / Bachelor's Degree in Computer Science & Engineering — SJC Institute of Technology (SJCIT), Karnataka

CERTIFICATION

- Data Analytics Job Simulation — Deloitte (Forage), March 2026
